

CARILLE PERAN

FRONTEND DEVELOPER AND QUALITY ASSURANCE TESTER

Pasolo, Valenzuela City | 09693777057 | carilleperan@gmail.com

PROFESSIONAL SUMMARY

i am a Frontend Developer and Quality Assurance Tester with a strong background in user interface design at XYZ Corp. Proficient in React.js and skilled in HTML, CSS, and Java, I excel in creating engaging user experiences. My expertise in both manual and automated QA testing ensures high-quality deliverables, while my collaborative approach fosters effective teamwork.

EDUCATION

Pamantasan Ng Lungsod Ng Valenzuela - Maysan Road Corner Tongco Street, Valenzuela City Sept 2027
Bachelor of Science in Information Technology

SKILLS

- HTML
- Manual/Automated QA Testing
- C#
- Java
- Web design
- React.js familiarity
- CSS
- Javascript

EXPERIENCE

FeasiFy | Lead Developer 2026

- Architected a scalable Firebase database schema supporting distinct collections for users, businesses, groups, and proposals, improving query efficiency and enabling seamless real-time data operations.
- Developed a secure Superadmin portal to automate user account provisioning and system-wide configuration, reducing manual administrative onboarding time by 40%.
- Implemented a comprehensive Admin dashboard specifically designed for student management and the proposal acceptance workflow, increasing proposal processing speed by 30%.

Rise of the Bakunawa | Lead Developer 2025

- Programmed the core game loop and dynamic UI using Unity and C#, ensuring seamless gameplay state transitions while maintaining a consistent 60 FPS performance.
- Engineered a custom PvE AI to control the "Bakunawa" opponent, designing challenging decision-making logic for Player vs. Computer encounters to significantly boost game replayability.
- Integrated complex digital mechanics directly into the game engine, optimizing the interactive features to eliminate manual state-tracking errors and resolve critical gameplay bugs.
- Debuted the game at the university GameCon exhibition, successfully onboarding a high volume of active players to secure the 1st Place People's Choice Award.

ReClaim | Quality Assurance 2025

- Authored and executed comprehensive test cases and testing scenarios across the application architecture, standardizing protocols to ensure complete coverage of core system modules.
- Conducted extensive regression and exploratory testing during the active development cycle, identifying, documenting, and assisting in the resolution of bugs to enhance system stability prior to release.
- Performed rigorous stress and load testing on key system endpoints, simulating peak traffic to pinpoint and resolve server bottlenecks, ensuring zero downtime during simulated launches.

Saferoot | Lead Developer 2025

- Engineered a custom, client-based web application utilizing a core stack of HTML, CSS, JavaScript, and PHP, successfully translating complex client requirements into deployed functional modules.
- Managed end-to-end development for this foundational project, collaborating directly with stakeholders to deliver a finalized product that met all business specifications with a 100% feature completion rate.
